

Restaurant Review

Welcome in Restaurant Review user manual.

Restaurant Review is a simple, easy to use application which offers reviews of restaurants around you. Application shows restaurants on the map based on their GPS coordinates in radius of 500 meters from the centre of the map. Restaurants that are currently visible on the map are displayed in a list form on the side of the map. A filter tool allows user to display restaurants between X and Y rating stars. The map is updated in real time to show corresponding restaurants. User can click on restaurant displayed in list to see it's details, street view photo and also reviews of that restaurant (if any exists). User can add his own restaurants and also add a reviews about an existing restaurants.

5. Adding new restaurant

6. Restaurants details view

7. Adding new review

Please note :
Chapters 1.2 and 2.3 are very crucial.
JSON server MUST run to run application !

1. Installation

1.1 Node.js installation

First you have to install Node.js

<https://nodejs.org/en/download/package-manager/>

Use link above to go to package manager install page for node.js, select your operating system and follow instructions to download and install Node.js on your computer. After you've done that, make sure that Node.js is running on your system. To do this we will use command line. Open new command line and type :

```
node --help
```

and press Enter.

You will know you have got it working if you get a list of commands and their descriptions.

1. Installation

1.2 JSON Server installation

Third you have to install json-server

Open new command line and type :

```
npm install -g json-server
```

and press Enter.

After you've done that, make sure that json-server is installed on your system.

Open new command line and type :

```
json-server --help
```

and press Enter.

You will know you have got it working if you get a list of commands and their descriptions.

2. Starting application

2.1 Copying application files

Copy application files (restaurant-review-app directory and its content) onto your local hard drive.

2.2 Installing React modules

Open command line, navigate into application restaurant-review-app directory on your hard drive and type in command line :

```
npm install
```

and press Enter.

Npm will install all node modules needed to run application.

2. Starting application

2.3 Starting JSON-server

Application is using JSON-server to fetch data from json file. Json file with pre-filled restaurants data in json format is located in application directory under the following path :

restaurant-review-app/src/data/restaurantsData.json

When we start JSON-server it will run under port 3004, but if you wish to run JSON-server under different port – please change the port number in the following json file :

restaurant-review-app/src/data/json-server.json

by simply editing its content :

```
1 ▼ {  
2   | "port": 3004  
3   }  
4
```

2. Starting application

To start JSON-server open command line and navigate to directory :

restaurant-review-app/src/data

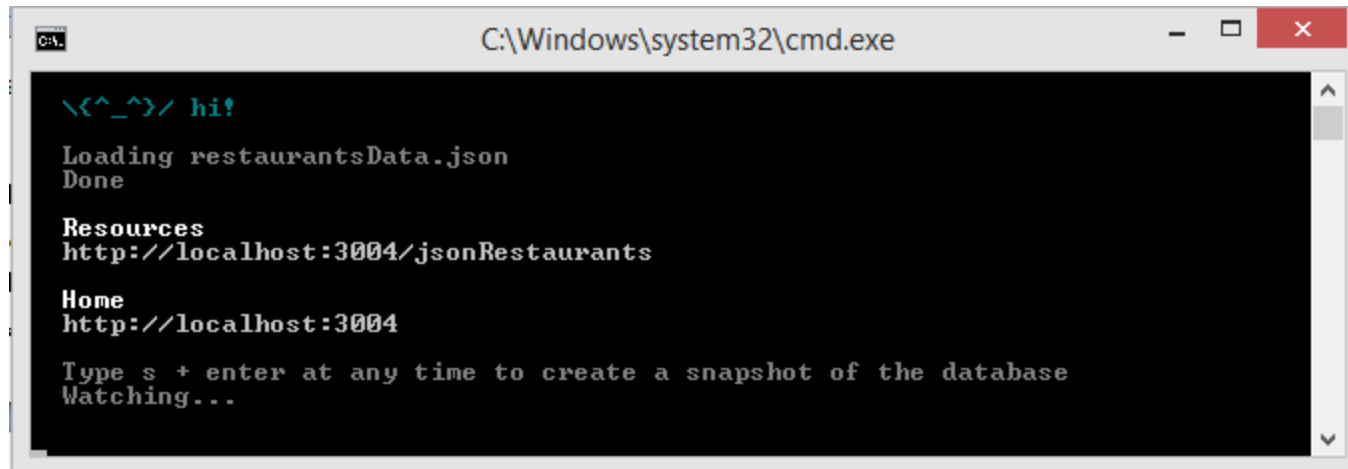

When you are in that directory type in command line :

```
json-server --watch restaurantsData.json
```

and press Enter.

IT IS VERY IMPORTANT TO START JSON SERVER – OTHERWISE MAP WILL NOT LOAD !!!

You will know that JSON-server is running when you see this window :

A screenshot of a Windows command prompt window. The title bar shows the path 'C:\Windows\system32\cmd.exe'. The command prompt shows the following text: a green prompt character followed by 'hi!', then 'Loading restaurantsData.json' and 'Done'. Below that, it says 'Resources' followed by 'http://localhost:3004/jsonRestaurants', and 'Home' followed by 'http://localhost:3004'. At the bottom, it says 'Type s + enter at any time to create a snapshot of the database' and 'Watching...'.

```
C:\Windows\system32\cmd.exe

\<^_>/ hi?

Loading restaurantsData.json
Done

Resources
http://localhost:3004/jsonRestaurants

Home
http://localhost:3004

Type s + enter at any time to create a snapshot of the database
Watching...
```

2. Starting application

2.4 Starting Restaurant Review Application

And now it is time to do last step – to start our application

In command line navigate to application main directory :

restaurant-review-app

When you reach the destination above – type in command line :

```
npm start
```

and press Enter.

Restaurant Review Application will open in new window in your web browser under the local host port 3000.

3. Geolocation

We are using geolocation to find user position and deploy user position marker on a map. When application starts pop-up window will appear :

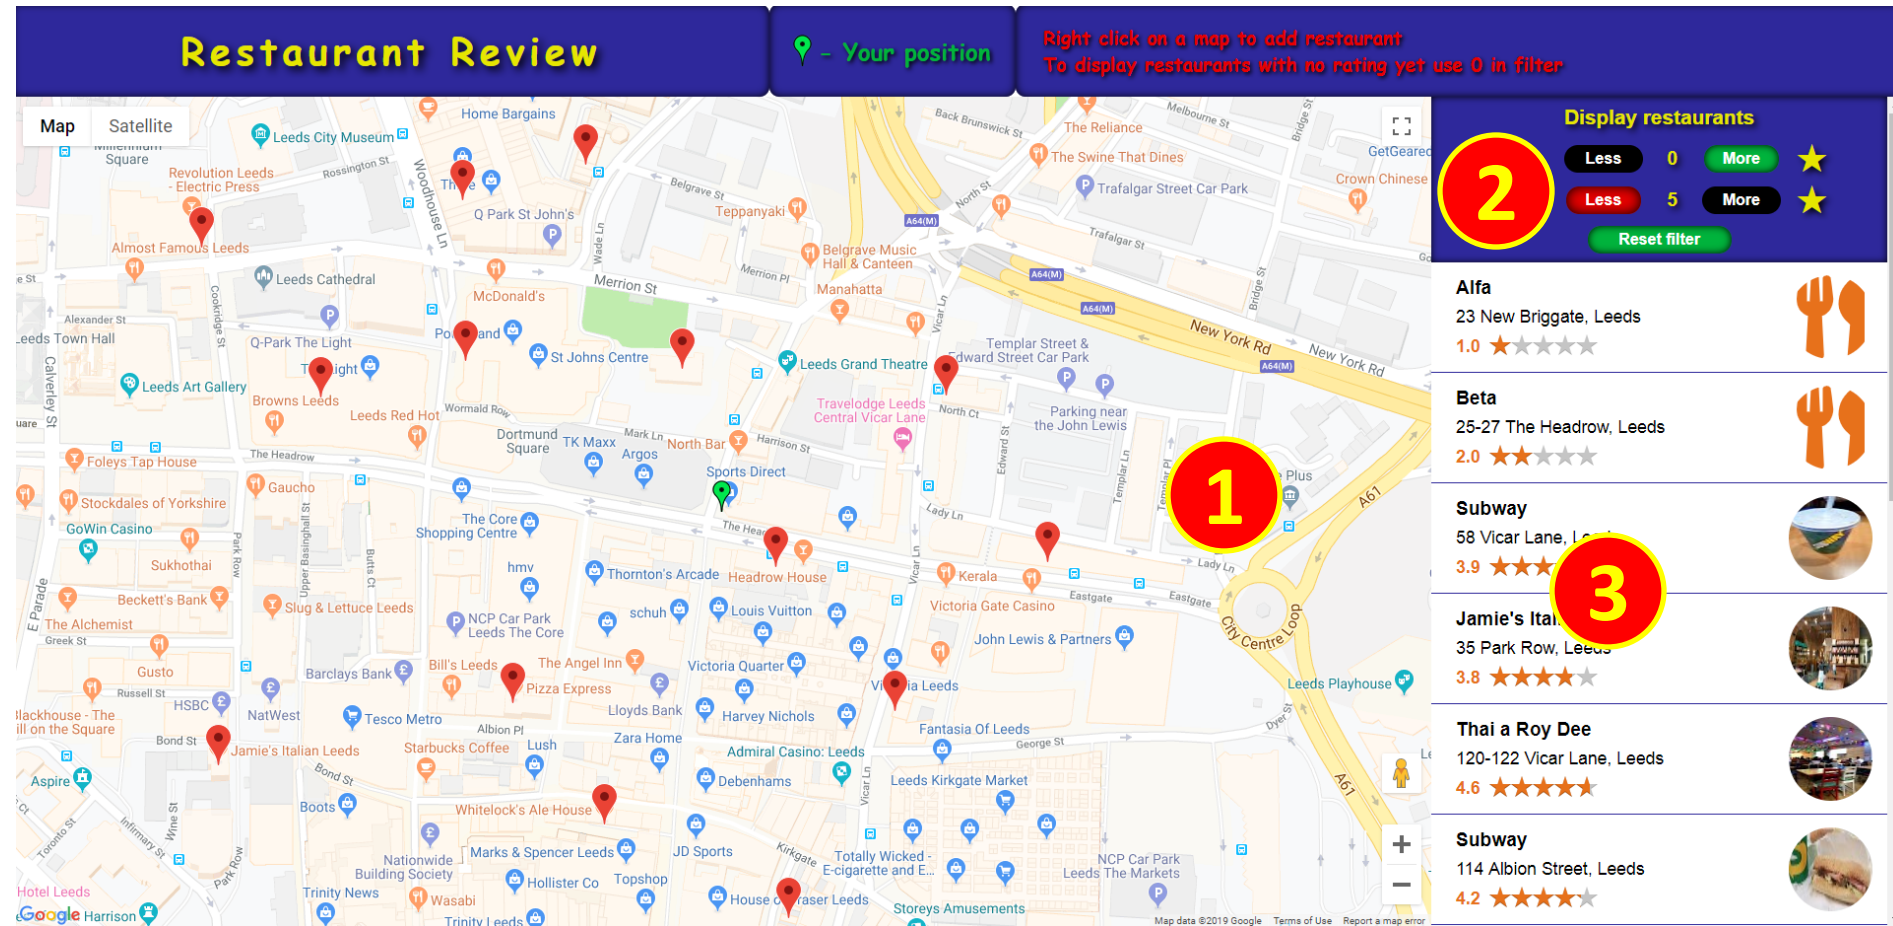

Please let us to have your location by click Allow button. If you allow for it - the center of the map will be set to your location and you will see marker with your position on a map :

If you will not allow us to have your location or geolocation is not available then center of the map will be set to the center of Leeds in United Kingdom.

4. Main screen

1 - Map

2 - Filter

3 - List

4. Main screen

4.1 Map

Restaurants are displayed on the map in a marker form based on their GPS coordinates. When you click on a marker a info window will appear. Info window contains name of a restaurant and address.

You can zoom in or zoom out using two buttons located in the right-bottom corner of the map. Alternatively you can control zoom level using mouse wheel.

To switch between street map view and satellite map view, use two buttons located in left-top corner of the map.

4. Main screen

4.2 Filter

A filter tool allows to display restaurants between X (minimum) and Y (maximum) rating stars. 0 (zero) in filter criteria allows you to display restaurants with no rating yet.

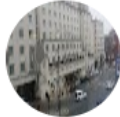

Black button color means that button is inactive.

Reset filter button allows you to reset filter criteria to display all restaurants from 0 rating stars to 5 rating stars.

A map and the list are updated in real time to display corresponding restaurants.

4. Main screen

4.3 List

Alfa 23 New Briggate, Leeds 1.0 ★☆☆☆☆		
Beta 25-27 The Headrow, Leeds 2.0 ★★☆☆☆		
1 The Queens City Square, Leeds 3 4.2 ★★★★★	2	4 
Park Plaza Leeds City Square (Leeds), Boar Lane, Leeds 4.1 ★★★★★		
Jamie's Italian Leeds 35 Park Row, Leeds 3.8 ★★★★★		
Subway 58 Vicar Lane, Leeds 3.9 ★★★★★		

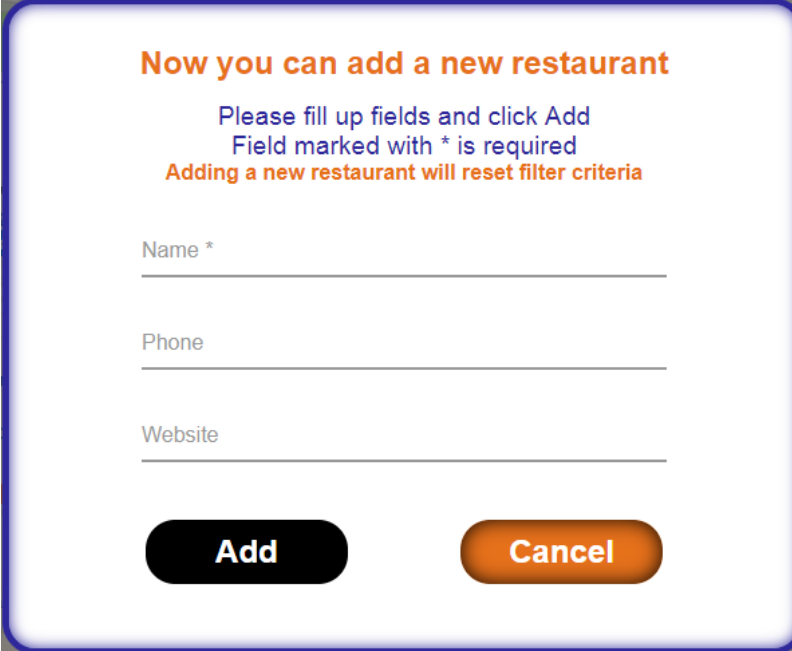

- 1** - Restaurant name
- 2** - Restaurant address
- 3** - Average restaurant rating
- 4** - Place photo

Restaurants visible on a map and fulfilling filter criteria are displayed on right side of the map in a list form.

5. Adding new restaurant

To add a new restaurant simply right-click on a map in a place where you want to add a new restaurant.

A modal window will appear :

Now you can add a new restaurant

Please fill up fields and click Add
Field marked with * is required
Adding a new restaurant will reset filter criteria
